Index to Volume 13

Note: The subject index is based upon the keywords allocated to each paper. The keywords are rotated in order so that each one appears once as the first index term. The complete list of permitted keywords is published in *Estuarine and Coastal Marine Science* 5 (2), i–xl.

Abundance; California coast; food webs; benthos; sewage; isotopes, 701
—;competition; salinity; temperature; Queensland coast; Copepoda, 591
Adenosine triphosphate (ATP); carbon cycle; Australia east coast; mangrove swamps; particulate matter; tidal flushing; organic matter; chlorophylls, 247
Air–sea interaction; meteorological data; geodesy; North Sea; sea levels; currents, 287
Air–water interactions; temperature responses; coastal lagoons; Florida coast; heat budget; energy balance; computer simulation, 159
Aldabra Atoll; Indian Ocean west; tidal flushing; tidal variations; tidal data; ecological distribution; zonation; Chagos Islands, 389
Americium; sediment transport; continental shelves; Pacific Ocean northeast; plutonium, 659
Ammonia; manganese; estuaries; mixing processes; statistical analysis; interstitial water, 357
Analysis; bacteria; organic matter; shallow waters; Baltic Sea; ecosystems, 579
ANNOUNCEMENT, 355
Annual variations; exports; river discharges; Columbia River estuary; dissolved organic compounds; particulate matter; TOC, 645
Anoxic conditions; benthic fauna; diversity; population variations; Australia east coast; marine ecology; estuarine fauna; stress, 597
ANWAR, H. O., A study of the turbulent structure in a tidal flow, 373
Arabian sea; estuaries; physical properties; chemical properties; monsoons; salt wedge; shoals; India coast, 557
Associations; ecology; spatial distribution; tidal currents; chemical attraction; Menai Straits; Demospongiae; sublittoral fauna, 621
ASTON, S. R., *see* STANNERS, D. A., 101, 409
Atlantic Ocean east; France coast; hydrologic regime; weather; temperature; phytoplankton; zooplankton, 131
Australia; bioindicators; monitoring methods; hydrocarbons; oil pollution; petroleum; coastal waters; *Mytilus*, 433
— east coast; mangrove swamps; particulate matter; tidal flushing; organic matter; chlorophylls; adenosine triphosphate (ATP); carbon cycle, 247
————; marine ecology; estuarine fauna; stress; anoxic conditions; benthic fauna; diversity; population variations, 597
Bacteria; organic matter; shallow waters; Baltic Sea; ecosystems; analysis, 579
